

Spencer 755 Head immobilization device

The 755 cervical immobilization device is designed to be an efficient and cost effective solution in cervical spine immobilization.

The unique, simple construction is designed to provide maximum immobilization, yet allows access to the patient's head for evaluation and treatment. Pressure sensitive fasteners firmly secure the device to the spine board for rigid immobilization of the head.

- Dual anchor head strap provide superior immobilization
- High density, polyethylene construction ensures rigid support
- Accomodates adult and paediatric patients
- Waterproof and lightweight
- Closed cell, non-absorbent foam padding cushions the patient's head
- Radiolucent
