

SPENCER CONTOUR

Universal head immobilizer

The new and exclusive design and shape of the Spencer Contour head immobilizer was tested by EMS on the road. The Spencer Contour is realized with moulded antitoxic PVC and poliurethane which will not absorb blood or any other body fluids. If placed on a spinal board with its Velcro straps and used with a cervical collar, it allows to transfer a patient even from rough areas. The Contour also goes into X-Ray chamber thanks to its radiolucent materials. Ideal for adult and child.

The Complete Spencer Contour includes: an immobilizer base, a removable head pad, two foam blocks and head straps.
