

ROCK REFLEX STRAPS FOR SPINAL BOARDS

Rock straps are designed to provide “full body” immobilization and are compatible with all full-length back-boards with 8 or more hand holds or strap slots. Reflective strips are inserted in the strap webbing to guarantee high visibility in bad lighting conditions.

Colour-coding is internal: at the back of each matching Velcro part the colour of the material is different according to the position and ensures correct strapping.

Emergency yellow/black is uniform on the outer part for a smarter and cleaner look and to enhance the reflective properties of the strapping system.
